

Kateřina Fickov

I am a first-year bachelor's student of Physics. A year ago I did SO at the Department of Condensed Matter Physics and in the future I would like to keep studying experimental physics. During these first months I have noticed both small and large problems and I would like to work on minimalizing them.

Election program:

Hygiene supplies

I would like to put hygiene stations in every bathroom all over whole MFF UK, which would regularly be refilled. Disinfection would be added later.

Disputes with teachers, again

This is a topic which is dealt with every year and everyone tries to solve it, however as a young student I have a fresh set of eyes to look at the situation and try to fine-tune and further appeal to this topic. This includes students with special needs. I would specifically like to focus on how older teachers do not respect their needs and compensations.

Practical Course – yes...

Like every year this topic will be discussed, because despite several efforts it still needs an adjustment. Students have to complete the lab report within fourteen days or until the next measurement, which if they don't they face big problems. Teachers also have a deadline of fourteen days, however they do not often return checked lab reports even after a month. This requires a change I would like to carry through.

Kuchyka

This problem is faced only by students which attend the Troja campus. Some time ago the Kuchyka bus stop has been moved further away from campus, which can be a problem when you're trying to get to a lecture in time. I would be nice if the bus stop was back where it should be.

MFF UK publicity

We all know Matfyz has an excellent reputation, however every year the publicity is based solely on it. At every even like Day of open doors or Gaudeamus, it's more and more based on the fact that we are UK and that guarantees quality. I would like to promote Matfyz from other points of view as well.

Your comments and reminders

SKAS tries to listen to students and their comments and is very positive about every reminder. I would like to add a little bit more to this and be more active by sending out anonymous polls with which it will be easier for students to directly contact SKAS.

If you have any questions or comments don't be afraid to contact me.
