

Where can you meet me?

- In the hallways of Malá Strana, rarely IMPAKT, during lectures for the 3rd year of Bc. Systems Programming.
- At events of the [Correspondence Seminar in Programming](#) or [MaSo](#), both of which I organize.
- In and nearby [room S322](#) while I'm casting spells at printers, computers and other monsters I take care of at KAM and IUUK.
- Hopefully next semester at a cybersecurity and hacking subject I'm preparing with a few of my colleagues.
- During my talks, be it at KSP's [Smršť](#) or [Installfest](#).
- Among the authors of the [petition](#), during the discussion with the dean and the subsequent hearing of the academic senate about Microsoft e-mails.
- At a CTF with [CzechCyberTeam](#) or organizing [Kybersoutěž](#).
- On MFF Discord as Greenscreener.

What do I want to do in the student chamber?

The student chamber doesn't have many official authorities, but it fulfils an essential role as an advisory body, meeting with the leadership of the faculty outside of its official sessions and representing the opinions of the students. I'd like for the student chamber to be more active and more transparent in fulfilling this role – so the only visible thing it does isn't just a few vague sentences sent to discord.

I don't just study at matfyz, I'm also an organizer of a seminar and a non-academic employee so I can often see what goes on at the faculty from multiple different points of view. I want to help find solutions that make sense for everyone.

More specifically, I want to look further into the (non-)usage of M365 at the faculty and the contents of the new accreditation of bachelor's Computer Science.
