

# František Zajíc

I am first-year master student of Physics of Condensed Matter and Materials, I focus mainly on the preparation of single-crystal scintillators. I organized correspondence seminar M&M and I still organize camp School of Mathematics and Physics. I teach Physics part-time at high school Gymnázium Christiana Dopplera.

I was student senator for the last election period of 2020-2023. I was an active senator, many things were achieved and changed, and I would like to continue to do so in the next election period.

## What is waiting for us:

### Election of Dean

In this election period, we are facing the election of the dean. Of course, we don't know the candidates yet, but I have no problem supporting the current dean Mirko Rokyta for a second term, if he choose to run again.

### Code of Ethics

The faculty still does not have its Code of Ethics, it should be created in the following months and years. This is a problem mainly because of current lack of rules for relationships between teachers and students. I would like to be actively involved in its creation.

### Propagation of MFF UK

I am the representative of SKAS in the Propagation Committee of the MFF UK. In the autumn, an analysis of the economic demands of individual forms of propagation will take place, which will probably have an effect on the correspondence seminars and camps. At the same time, the status of seminars will probably change in the next period and they will be transformed into separate associations. I would like to offer my experience from this environment and ideally change the view (and funding) of these events so that they are not only viewed as form propagation, but mainly as educational events.

## Already done:

### Final exams and thesis defence separately

After long and often demanding discussions, it was allowed that the master's students in the Mathematics and Physics section can take their final exams and thesis defence at a different date (bachelor's and informatics students already had this option). I will advocate for this possibility to be as accessible as possible and not bound by any other additional conditions (which threatens especially the math section).

### Doctoral students

Based on my initiative, an analysis of the income of doctoral students was prepared. I would like to advocate for the management to find a way to ensure funding for doctoral students to such an extent that they can (if they decide) only study and are not forced to earn extra money elsewhere.

### Counselling services and mental health

At the initiative of SKAS, a coordinator of advisory services was hired. Don't hesitate to [contact her if needed](#).
