Abstract: Use the most precise, shortest sentences that state what problem the thesis addresses, how it is approached, pinpoint the exact result achieved, and describe the applications and significance of the results. Highlight anything novel that was discovered or improved by the thesis. Maximum length is 200 words, but try to fit into 120. Abstracts are often used for deciding if a reviewer will be suitable for the thesis; a well-written abstract thus increases the probability of getting a reviewer who will like the thesis. [This is not a copy of your thesis assignment!]

# List of Figures

[Optional.]

# List of Tables

[Optional. In mathematical theses, it could be better to move the list of tables to the beginning of the thesis.]

# List of Abbreviations

[Optional. In mathematical theses, it could be better to move the list of abbreviations to the beginning of the thesis.]

# A Attachments

[Attachments to the thesis, if any. Each attachment must be referred to at least once from the text of the thesis. Attachments are numbered.]

[The printed version should preferably contain attachments, which can be read (additional tables and charts, supplementary text, examples of program output, etc.). The electronic version is more suited for attachments which will likely be used in an electronic form rather than read (program source code, data files, interactive charts, etc.). Electronic attachments should be uploaded to SIS. Allowed file formats are specified in provision of the rector no. 72/2017. Exceptions can be approved by faculty's coordinator.]
