

RULES FOR AWARDING SCHOLARSHIPS AT THE FACULTY OF MATHEMATICS AND PHYSICS OF CHARLES UNIVERSITY

of 23 June 2017

as amended by the Rules of 24 June 2022

*Under sections 27 (1) (b) and 33 (2) (f) of Act No. 111/1998 Sb., to regulate higher education institutions and to change and amend other laws (the Higher Education Act), as amended, and under Article 20 (2) (f) of the Constitution of the Faculty of Mathematics and Physics of Charles University, the Academic Senate of the Faculty of Mathematics and Physics of Charles University has adopted the following Rules for Awarding Scholarships and Bursaries at the Faculty of Mathematics and Physics of Charles University as an internal regulation of the Faculty: **

Article 1

Introductory provision

These Rules for Awarding Scholarships and Bursaries at the Faculty of Mathematics and Physics of Charles University (“the Faculty” and “the University”) set out, based on the relevant provisions of the Scholarship and Bursary Rules of Charles University (“the Rules”), the conditions, rules, details, and other requirements for awarding scholarships and bursaries at the Faculty.

Article 2

Scholarship for Outstanding Academic Achievement

(under Article 4 of the Rules)

1. The criterion for awarding the scholarship in the current unit of study is the results achieved by a student during the previous unit of study (“the decisive unit of study”).
2. The key requirements for awarding a scholarship for outstanding academic achievements are as follows:
 - a) The student’s actual period of current study has not exceeded the standard period of study; in addition, in the case of a first-year student in a master’s programme of study, the student must have graduated from a bachelor’s programme of study in the academic year immediately preceding the current academic year, and he must have not exceeded the standard period of study.
 - b) The student has obtained at least 60 credits in the decisive unit of study if a unit of study corresponds to an academic year, or at least 30 credits if a unit of study

* Translator’s note: Words importing the masculine include the feminine, and unless the context otherwise requires, words in the singular include the plural and words in the plural include the singular.

corresponds to a semester. Credits obtained for recognised subjects completed in other studies are not included.

3. The student's weighted average grade achieved is calculated from the aggregate of all grades received during the decisive unit of study in the subjects the student registered for and which were completed with an exam or graded course credit ("the average result of study"); grades for the recognised subjects in other studies are not included in the calculation. If the student did not receive any grade from which a weighted average grade can be calculated, he cannot be awarded the scholarship. The weight of each grade is the number of credits assigned to a subject in the curriculum. The various studies undertaken by one student are assessed separately.
4. For the purposes of awarding the scholarship for outstanding academic achievement, students are divided into the following groups according to their programme of study and current year of study, unless the Dean of the Faculty stipulates otherwise no later than at the beginning of the decisive unit of study:
 - a) first-year students of bachelor's programmes of study ("Group Ia");
 - b) second-year students of bachelor's programmes of study ("Group Ib");
 - c) third-year students of bachelor's programmes of study and first-year students of master's programmes of study ("Group II");
 - d) second-year students of master's programmes of study ("Group III").
5. The scholarship for outstanding academic achievement is awarded in a higher or lower amount ("the higher scholarship" and "the lower scholarship") depending on the student's average result of study. The higher scholarship is usually at least 50% higher than the lower scholarship. The amount of the higher and lower scholarships for the current academic year and unit of study is determined by the Dean of the Faculty within the limits set out in Article 4 (3) of the Rules, following the opinion of the Academic Senate.
6. To be awarded the higher and lower scholarship for each of the Groups above, the lowest possible average result of study is determined in a Dean's directive issued no later than at the beginning of the decisive unit of study, following the opinion of the Academic Senate of the Faculty.
7. For the purposes of this article, in the case of first-year students of master's programmes of study, their last year of studies in the bachelor's programme of study is considered the previous unit of study. If, in such cases, the studies did not take place at the Faculty, a decision regarding the scholarship is made based on written documents submitted to the Student Registry no later than on the 15th day of the current academic year; the Dean decides on the awarding of the scholarship in such cases, and the basic criteria for the decision are the results achieved in subjects similar to those studied at the Faculty, and the number of credits obtained in those subjects.
8. If the number of students to whom the higher scholarship or lower scholarship is awarded under paragraph 6 is lower than 10%, then for each Group under paragraph 4, in which the higher and lower scholarships are awarded to fewer than 10% of students in the Group, the value of the threshold for awarding the lower scholarship will be changed to a value that will be achieved by 10% of students in a given Group ("the new Group threshold"). In such a case, the lower scholarship is also awarded to all students

- in each Group whose average result of study does not exceed the new Group threshold, and who have not been awarded the scholarship under paragraph 6.
9. If the higher or lower scholarship under paragraphs 6 and 8 is awarded to fewer than 10% of students, and there is no obstacle to the awarding of the scholarship under the Rules (“the minimum number of students”), the lower scholarship is also awarded to further students who have satisfied the basic requirements for the awarding of the scholarship in the order of their average result of study until the scholarship is awarded to at least the minimum number of students. If multiple students achieved the same average result of study, the scholarship is awarded either to all of them or to none of them.
 10. In cases worthy of special consideration, the Dean may award and allow the payment of the scholarship for outstanding academic achievement to a student who does not satisfy the requirements set out in paragraphs 6, 8, or 9. The Dean decides based on a written submission from the student concerned, on which submission the student chamber of the Academic Senate expresses its opinion. When deciding about the submission, the Dean will consider how the student has pursued the current studies so far.
 11. Students in Group Ia are awarded the scholarship for outstanding academic achievement by 30 April of the unit of study that follows the decisive unit of study. Students in Groups Ib, II, and III are awarded the scholarship by 30 November of the unit of study that follows the decisive unit of study. The students entitled to the scholarship for outstanding academic achievement are informed via the Student Information System of the University.
 12. The scholarship for outstanding academic achievement is paid out as a lump sum.

Article 3

Scholarship for Outstanding RDI (Research, Development, and Innovation), Artistic, or Other Creative Achievement Contributing to Greater Knowledge (“the Scholarship for Outstanding Achievement”)

(under Article 5 of the Rules)

1. The scholarship for outstanding achievement may be awarded, in compliance with the conditions set out in the Rules, to students who have achieved, or participated in the achievement of, an outstanding scientific result. An outstanding scientific result means in particular the publication of a research paper or giving a presentation at a scientific conference.
2. The scholarship is usually not awarded to a student who has already been awarded a scholarship, or a financial reward, from another resource, e.g., from a grant. In the case of doctoral students, this scholarship may be awarded in the form of increasing their bursary for publishing works that significantly contribute to the field under Article 7(2); in such a case, the previous sentence does not apply.

3. The scholarship for outstanding achievement is paid out as a lump sum, subject to the exception set out in the last sentence of the previous paragraph.
4. The Dean decides on the awarding of the scholarship by virtue of office. Anyone can make a proposal that the scholarship be awarded. The Dean will deal with such a proposal without undue delay.

Article 4
Scholarship for RDI (Research, Development, and Innovation)
Activities in Accordance with Special Legislation

(under Article 6 of the Rules)

1. The scholarship for RDI activities in accordance with special legislation¹⁾ is awarded,²⁾ in compliance with the conditions set out in the Rules, to students who carry out a research project financed under special legislation¹⁾, or who participate in such a research project.
2. The scholarship for RDI activities in accordance with special legislation is usually awarded in the amount stipulated in the approved budget of the project, depending on the fulfilment of tasks associated with a given reward. If the budget of the project does not contain any such information, the amount of the scholarship and responsible persons are determined by the researcher in accordance with the rules stipulated by the provider of funds and in accordance with the approved project.
3. The scholarship for RDI activities in accordance with special legislation is usually awarded to a student by the Dean based on the proposal of the project researcher delivered to the Dean via the Student Registry of the Dean's Office of the Faculty. The elements and format of a proposal are set out in the Rules of the Faculty for the Circulation of Accounting Documents or in a similar regulation. The scholarship for RDI activities in accordance with special legislation is paid out as a lump sum, before or after the respective activities are performed. Whether the payment is made in advance or after the activities are performed is determined by the project researcher depending on the nature of the activity.

1) Act No. 130/2002 Sb., to support research, experimental development and innovation.

2) Article 6 (1) of the Rules.

Article 5
Bursaries in Cases Worthy of Special Consideration

(under Article 9 of the Rules)

1. A bursary in cases worthy of special consideration can be awarded, in compliance with the conditions set out in the Rules, for participation in teaching and research activities, work in laboratories, contributions to the development of information technologies, international co-operation, including active participation in conferences and workshops, excellent sports achievements, representation of the Faculty, or laudable citizen acts, etc.; the amount of the bursary is determined by the Dean. An extraordinary form of bursary in cases worthy of special consideration is the bursary in the case of an urgently difficult student's situation.
2. A special form of bursaries in cases worthy of special consideration is a bursary for student projects funded from Faculty Student Grants ("the FSG"); the Dean decides on the awarding thereof twice a year, once in the autumn and once in the spring.
3. Any student or group of students of a full-time bachelor's or master's programme of study at the Faculty can apply for the FSG bursary. An applicant may file no more than one proposal for the FSG bursary in a given period; the same applies even if the student is a member of a group of applicants.
4. A proposal for a project to be funded from the FSG may be formulated by the applicant himself, or the applicant may register for participation in a project funded from the FSG published by a department of a Faculty school (the "department"). The departments can, in compliance with their teaching and research activities, make proposals for FSG projects and publish them as proposals for student works usually on the website or notice board of the department, by 15 October for the autumn round, and by 15 April for the spring round.
5. An applicant's written application for a bursary for a project funded from the FSG must contain the following elements:
 - a) the specification of the FSG project;
 - b) the current research regarding the given issue;
 - c) the aims of the FSG project, including a time schedule regarding the implementation, and the date of completion of the FSG project;
 - d) information about the students who will participate in the research under the FSG;
 - e) in the case of a project that is a follow-up to a project carried out previously, a detailed description of the continuity between the projects, and a detailed explanation of the actual benefit of the current proposal;
 - f) the opinion of a department at which, or in co-operation with which, the FSG project will be carried out. The opinion of the department will provide the name of a teacher who will act as the guarantor of the FSG project.
6. If there is a link between the proposed FSG project and the applicant's master's thesis, or the fulfilment of other study obligations prescribed in the curriculum, any such link must be specified in the opinion of the department.

7. Written applications for FSG bursaries are to be filed to the Dean by 15 November for the autumn round, and by 15 May for the spring round.
8. The Dean decides on the awarding of the FSG bursaries, and the number and amount thereof, based upon a proposal of the Student Grants Committee. The chair and members of this Committee are appointed by the Dean. The members are usually persons representing all fields of study under which programmes of study offered at the faculty fall, and at least one representative of students appointed for one academic year upon a proposal of the student chamber of the Academic Senate of the Faculty.
9. If a bursary for the FSG project is awarded, the bursary is paid in two instalments. The first instalment is one half of the amount awarded (unless the Dean decides that this amount be lower) and it is paid out in the form of an advance payment on the closest date on which bursaries are paid. The second instalment is paid after the project funded from the FSG has been completed and results approved by the Dean following a proposal of the Student Grants Committee. If the bursary is awarded to a group of students, the amount paid in advance will be evenly divided among the bursary recipients; the remaining amount will be paid out in the proportion approved by the Dean upon a proposal of the Student Grants Committee. If the FSG project is not completed by the deadline set, or if the Dean assesses it as 'failed' on the proposal of the Student Grants Committee, the student, or group of students, will not receive the remaining instalment of the bursary; in the case of a gross failure in achieving the aims for which the bursary was awarded, the Dean may even request the respective student, or group of students, stating the reasons therefor, to return the amount that has already been paid out.
10. A bursary recipient is obliged to prepare and submit to the Dean, no later than within 14 days of the completion of the FSG project, a written report in which he will describe the course of the FSG project, results achieved, and their possible application. If a group of students worked on the FSG project, the report will also describe how each of those students contributed to the FSG project. If possible and where applicable, the bursary recipient (or team of bursary recipients) is obliged to acknowledge the FSG project in any output resulting from the FSG project (articles, textbooks, websites, etc.). The report must include a statement of the teacher who acted as a guarantor of the FSG project according to paragraph 5 (f), regarding the fulfilment or otherwise of the aims of the FSG project.
11. The Student Grants Committee holds a meeting by 1 December for the autumn round, and by 1 June for the spring round. At the meeting, the Committee will choose from among the submitted FSG projects the ones to be recommended to the Dean for the awarding of the bursary, along with the information regarding the amount of the bursary and the date of completion of the FSG project. Bursaries are not awarded for projects prescribed by the curriculum.
12. For the meeting under paragraph 11, the Student Grants Committee will also prepare proposals for the assessment of completed FSG projects based on reports submitted by students or a group of students to whom the bursary was awarded. Where necessary, the chair of the Committee may convene a meeting of the Student Grants Committee for this purpose on a different date. In the case of exceptionally well-implemented FSG projects significantly contributing to the field (e.g., where the papers have been accepted

for publication in a renowned journal), the Student Grants Committee may recommend to the Dean that the amount of the bursary be increased.

13. The Dean can also award to a student or a graduate a scholarship in the form of the Prize of the Dean of the Faculty of Mathematics and Physics for the Best Bachelor's or Master's Thesis. The Prize is awarded for the best bachelor's or master's thesis that reaches an extraordinary level, be it professionally or pedagogically. The Prize is usually awarded for works that have been published, accepted for publication, or which are of a comparable quality. Details as to the organisation of the awarding the Dean's Prize are provided in a Dean's directive.

Article 6 **Bursary to Support Study Abroad**

(under Article 10 of the Rules)

1. A bursary to support study abroad can be awarded, in compliance with the Rules, as a contribution to cover the costs of study abroad to students who participate in instruction abroad, do research work at a foreign higher education institution, participate in workshops or summer schools, or carry out activities connected with the preparation of their final thesis, article, monograph, etc. (e.g., study or collecting resources in foreign libraries or archives, etc.). When determining the amount of the bursary, the Dean will take into consideration the anticipated or real costs of the stay, as well as whether or not the student has received support for a given activity from other sources.
2. The Dean decides on the awarding of the bursary based on the student's application; the Dean may ask a relevant member of the academic staff (the vice-dean, guarantor of the programme of study, final thesis advisor, another teacher, etc.) for an opinion. The application must be submitted no later than within one month of the end of the respective stay abroad.
3. The bursary to support study abroad can be granted to a student of a bachelor's programme of study no sooner than after he has finished his first year of studies.
4. The bursary to support study abroad is paid as a lump sum.

Article 7 **Doctoral Bursary**

(under Article 12 of the Rules)

1. When determining the amount of doctoral bursaries for individual years of study, the Dean will take into account the amount of subsidy allotted for doctoral bursaries and the number of students enrolled in a full-time form of doctoral study, and he will decide in compliance with the conditions set out in the Rules. The amount of bursary for the

second, third, and fourth years of study cannot be lower than the amount of bursary for the first year of study.

2. Students can be also given an increase of CZK 1,000 per month in the bursary for significant publication activities in the field. The Dean decides on this increase based on the recommendation of the relevant Subject Area Board, usually acting upon a proposal from a supervisor; the increase is effective as of the following calendar month.

Article 8

Common provisions

1. The rules for proceedings regarding the awarding of scholarships and bursaries are regulated in the Rules, including the elements of applications, form of a decision, and the possibility to appeal a decision.
2. The payment of scholarships and bursaries can be made only by cashless transfer to a bank account maintained by a financial institution in the Czech Republic. A student is obliged to provide his bank account number for the purposes of the payment of scholarships and bursaries. In exceptional cases, the Dean may allow a different mode of payment.
3. Details regarding the submission of applications for scholarships and bursaries, elements thereof, payment conditions for scholarships and bursaries, and other related matters are stipulated in accordance with the internal regulations of the University and the Faculty in a Dean's directive following consideration in the Academic Senate of the Faculty. The Dean may stipulate in such directive that the application for awarding a scholarship or bursary be submitted solely in electronic form.

Article 9

Transitional and Final Provisions

1. Proceedings started before the date of effect of these Rules for Awarding Scholarships and Bursaries will be completed under these rules.
2. The Rules for Awarding Scholarships and Bursaries at the Faculty of Mathematics and Physics of Charles University approved by the Academic Senate of the Faculty on 28 February 2007, as amended, are hereby repealed.
3. Other facts not mentioned in these rules are regulated by the Scholarship and Bursary Rules of Charles University in effect.
4. This regulation was approved by the Academic Senate of the Faculty on 14 June 2017.

5. This regulation comes into force on the date of approval by the Academic Senate of Charles University.³⁾
6. This regulation becomes effective on the first day of the calendar month that follows the month in which it came into force.

Selected provisions of amendments

Article II of the amendment to the Rules for Awarding Scholarships and Bursaries at the Faculty of Mathematics and Physics of Charles University of 23 October 2020

Transitional provision

If the student's bursary had been increased in accordance with the first sentence of Article 7 (2) of the Rules for Awarding Scholarships and Bursaries at the Faculty of Mathematics and Physics of Charles University, as amended before this regulation became effective, the bursary will be decreased by the increased amount on the date of effect of this regulation.

3) Section 9 (1) (b) (2) of the Higher Education Act. This regulation was approved by the Academic Senate of Charles University on 23 June 2017, and the amendments were approved by the Academic Senate of Charles University on 24 June 2022.
